REPORTS ANALYST | OPERATIONS REPORTING | INVENTORY ANALYSIS | PROCESS AUTOMATION

PROFESSIONAL SUMMARY

Reports Analyst with experience collecting, validating, and organizing operational data to support recurring reporting cycles, KPI dashboards, and leadership reviews. Skilled in building automated data pipelines, real-time monitoring dashboards, and process improvements that eliminate manual effort. Independently developed and deployed a Supply Chain S&OP Performance Dashboard tracking forecast accuracy, inventory turnover, fill rates, and on-time delivery across 30 SKUs — demonstrating hands-on understanding of S&OP review structures and inventory performance monitoring.

CORE SKILLS

Reporting & Analysis: Operations Reporting, KPI Dashboard Reporting, Data Validation, Variance/Trend Analysis, Ad Hoc & Standardized Reporting, Exception Flags, CSV Exports, Monitoring Files

Tools & Platforms: Excel, Power Query, Word, Google Sheets, Chart.js, Supabase (PostgreSQL), GitHub, GitHub Actions

Data & Automation: Python, Node.js, JavaScript, SQL (PostgreSQL), Playwright Browser Automation, REST API Data Extraction, Google Sheets API, ETL/Data Pipelines, Scheduled Reporting Automation

Business Strengths: Process Improvement, Operational Excellence, Inventory Monitoring, Supply Ordering, Cross-System Data Integration, Stakeholder Coordination, Action Item Tracking, Deadline Management, Documentation

PROFESSIONAL EXPERIENCE

Reports Analyst | Alliance Global Solutions | January 2026 - Present

- Collect, validate, and organize operational data from multiple systems to support recurring KPI dashboards, monitoring files, exception reports, and leadership review cycles.
- Build and maintain real-time monitoring dashboards, role-stratified views, exception flags, and CSV exports serving 120+ operations users, enabling team leads and admins to track activity, violations, and action items.
- Design normalized PostgreSQL schema with indexed queries, Row-Level Security, and permanent audit tables; collaborate with stakeholders to define reporting requirements and recommend sustainable data architecture.

KEY PROJECTS

- **Supply Chain S&OP Performance Dashboard (Portfolio) — dither-reyes.vercel.app:** Built and deployed a dashboard tracking 5 KPIs — Forecast Accuracy (79% to 90.1%), Days of Supply (51.7 to 39.1 days), On-Time Delivery (92.3% to 97.8%), Fill Rate (94.2% to 98.1%), and Inventory Turnover (5.9x to 8.1x) — across 4 product families and 30 SKUs over 12 months; includes Top 30 SKU inventory report with DOS flags, forecast miss root cause analysis, S&OP scorecard heatmap, and shipment performance tracking.
- **AGS Break Monitoring System:** Designed and built a real-time compliance dashboard with automated data pipelines, normalized PostgreSQL schema, role-based access for 120+ users, overbreak violation tracking, bio break rolling-window calculations, filterable history logs, and CSV exports.
- **CTM KPI Reporting Pipeline:** Built a Python and GitHub Actions workflow that pulls live agent KPI data from the CTM REST API every 5 minutes and syncs it to a Google Sheets dashboard with smart caching, column preservation, and secure credential management — fully replacing manual reporting.

Shift Supervisor | Starbucks | July 2022 - October 2025

- Calculated supply order quantities using historical sales, material usage, product movement, waste, and inventory availability data to support replenishment decisions and daily planning.
- Coordinated product availability, stock rotation, and peak-period resource planning to maintain service levels while controlling waste and minimizing operational disruption.
- Improved food markout reporting by creating an Excel mapping file that standardized item lookups and reduced manual processing time from 15–20 minutes to about 2 minutes per report.

EDUCATION

Bachelor of Science in Business Administration, Major in Marketing, Colegio De San Lorenzo - 2020
